

Sauna stove with boiler connection

We produce all our medium and large sauna stoves with the option of connecting a water heater. The connection can be welded to all inner walls of the stove: right, left or back.

Water is supplied and discharged using two nipples with an external thread of $\frac{3}{4}$.

Sauna stoves with 40 l water tank

We also produce sauna heaters with a water tank. Tanks can be added to both medium and large heaters. The 40 liter tank can be made of both black metal and stainless steel. Location either on the right, left or back. The tank comes with a lid and tap. Tank dimensions: height 54 cm, width 38 cm and depth 21 cm.

It is also possible to order a 20l tank, in stainless steel, where the tank is built in at the front.

Other sauna products

Our main products also include various accessories for sauna stoves:

- decorative slats for doors of sauna stoves heated from another room;
- grates for stones around the smoke pipe;
- smoke pipes;
- decorative slats around the smoke pipe;
- smoke pipe drawer dampers;
- smoke pipe elbows, etc.

Skamet sauna stoves are high-quality and handmade. The sauna stoves are manufactured with a smoke channel where the flame does not reach the chimney, which ensures low temperatures in the chimney and its flues, low air pollution indicators and the efficiency remains mostly in the firebox/ smoke channels.

A correctly selected sauna stove requires less firewood to heat the sauna quickly:

- PS, P and PT models approx. 30-45 minutes;
- S, SS, SSY, ST, STY models approx. 60-90 minutes;
- Sauna stove connected to a hot water boiler, depending on the boiler capacity.

If the heating capacity is too low, you will have to heat the stove longer and more intensively, which in turn reduces the product's lifespan.

The manufacturer recommends:

- Choose the PS, P or PT model if you usually spend less than 2 hours in the sauna.
- Choose the S, SS or ST model if you spend more than 2 hours in the sauna.

How to choose a sauna stove with the right capacity?

There are 3 options to choose from:

1. The volume of the steam room is between 7–12 m³ – choose a mini sauna stove
2. The volume of the steam room is between 8–18 m³ – choose a medium sauna stove
3. The volume of the steam room is between 16–25 m³ – choose a large sauna stove

Of course, when calculating the volume, other nuances must also be taken into account: is there a window in the steam room, is any wall of the steam room an external wall of the house, does the steam room have a glass door, etc. If so, it makes sense to multiply the actual volume of the steam room by a factor of 1.2-1.5 – to get an estimated volume for choosing a sauna stove.

Our product dealers and factory representatives will be happy to help you choose a suitable sauna stove. There is also a "Selecting heater" calculator on our website.

EFFICIENT WOOD-BURNING
SAUNA STOVES

Mini sauna stove with metal cover (7–12 m³)

PS-110 GL heated from the same room – stove height 60 cm, width 39 cm ja depth 45 cm. Amount of stones about 20 kg and length of firewood up to 35 cm.

PS-210 GL heated through wall – and length of firewood up to 60 cm, width 39 cm ja depth 45 cm. Amount of stones about 20 kg and length of firewood up to 55 cm.

PS series sauna stoves are suitable for smaller saunas. The casing is double-walled on three sides. All PS series sauna models have a heat-resistant glass door (200x200 mm). The door opens from right to left as standard, but can also be ordered the other way around.

Mini sauna stove with net cover (7–12 m³)

SS-110 GL heated from the same room – angular net casing. Stove height 65 cm, width 40 cm ja depth 48 cm. Amount of stones about 90 kg and length of firewood up to 40 cm.

SSY-110 GL heated from the same room – round net casing. Stove height 65 cm, width 50 cm ja depth 50 cm. Amount of stones about 70 kg and length of firewood up to 40 cm.

SS-210 GL heated through wall – angular net casing. Stove height 65 cm, width 40 cm ja depth 48 cm. Amount of stones about 90 kg and length of firewood up to 55 cm.

SSY-210 GL heated through wall – round net casing. Stove height 65 cm, width 50 cm ja depth 50 cm. Amount of stones about 70 kg and length of firewood up to 55 cm.

SS series sauna stoves are designed for heating smaller sauna rooms and barrel saunas. All SS series models have a heat-resistant glass door (200x220 mm). The door opens from right to left as standard, but can also be ordered the other way around.

Sauna stove with metal cover – heated from the same room (8–18 m³)

P-116 heated from the same room. Stove height 73 cm, width 43 cm ja depth 51 cm. Amount of stones about 40 kg and length of firewood up to 40 cm. Door glass (230 x 230 mm) available upon request.

Well suited for medium-sized sauna rooms. Boiler connection option – right, left or back. Chimney connection from top or back. Door opens from right to left as standard, can also be ordered the other way around.

Sauna stove with metal cover – heated through wall (8–18 m³)

P-216 – stove height 73 cm, width 43 cm ja depth 51 cm. Amount of stones about 40 kg and length of firewood up to 60 cm. Door glass (230 x 230 mm) available upon request.

PT-216 GL – large door glass (330 x 330 mm), stainless steel panel and handle. Stove height 73 cm, width 43 cm ja depth 51 cm. Amount of stones about 40 kg and length of firewood up to 60 cm.

Chimney connection from above, possibility to order the stove contents reversed. The door opens from right to left as standard, can also be ordered the other way around.

Sauna stove with net cover – heated from the same room (8–18 m³)

S-116 – angular net casing, stove height 78 cm, width 49 cm ja depth 61 cm. Amount of stones about 190 kg and length of firewood up to 50 cm. Door glass (230 x 230 mm) available upon request.

SY-116 – round net casing, stove height 78 cm, diameter 56 cm. Amount of stones about 140 kg and length of firewood up to 50 cm. Door glass (230 x 230 mm) available upon request.

Chimney connection from above, possibility to order the stove contents reversed. The door opens from right to left as standard, can also be ordered the other way around.

Sauna stove with net cover – heated through wall (8–18 m³)

S-216 – angular net casing, stove height 78 cm, width 49 cm ja depth 61 cm. Amount of stones about 190 kg and length of firewood up to 70 cm. Door glass (230 x 230 mm) available upon request.

SY-216 – round net casing, stove height 78 cm, diameter 56 cm. Amount of stones about 140 kg and length of firewood up to 70 cm. Door glass (230 x 230 mm) available upon request.

ST-216 GL – angular net casing, large door glass (330 x 330 mm), stainless steel panel and handle. Stove height 78 cm, width 49 cm ja depth 61 cm. Amount of stones about 190 kg and length of firewood up to 70 cm.

STY-216 GL – round net casing, large door glass (330 x 330 mm), stainless steel panel and handle. Stove height 78 cm, width 49 cm ja depth 61 cm. Amount of stones about 190 kg and length of firewood up to 70 cm.

Chimney connection from above, possibility to order the stove contents reversed. The door opens from right to left as standard, can also be ordered the other way around.

Big sauna stove with metal cover – heated from the same room (16–25 m³)

P-120 – stove height 81 cm, width 43 cm ja depth 51 cm. Amount of stones about 50 kg and length of firewood up to 40 cm. Door glass (230 x 230 mm) available upon request.

Big sauna stove with metal cover – heated through wall (16–25 m³)

P-220 – stove height 81 cm, width 43 cm ja depth 51 cm. Amount of stones about 50 kg and length of firewood up to 60 cm. Door glass (230 x 230 mm) available upon request.

PT-220 GL – large door glass (330 x 330 mm), stainless steel panel and handle. Stove height 81 cm, width 43 cm ja depth 51 cm. Amount of stones about 50 kg and length of firewood up to 60 cm.

Chimney connection from above, possibility to order the stove contents reversed. The door opens from right to left as standard, can also be ordered the other way around.

Big sauna stove with net cover – heated from the same room (16–25 m³)

S-120 – angular net casing, stove height 84 cm, width 49 cm ja depth 61 cm. Amount of stones about 160 kg and length of firewood up to 50 cm. Door glass (230 x 230 mm) available upon request.

SY-120 – round net casing, stove height 84 cm, diameter 56 cm. Amount of stones about 110 kg and length of firewood up to 50 cm. Door glass (230 x 230 mm) available upon request.

Chimney connection from above, possibility to order the stove contents reversed. The door opens from right to left as standard, can also be ordered the other way around.

Big sauna stove with metal cover – heated through wall (16–25 m³)

S-220 – angular net casing, stove height 84 cm, width 49 cm ja depth 61 cm. Amount of stones about 160 kg and length of firewood up to 70 cm. Door glass (230 x 230 mm) available upon request.

SY-220 – round net casing, stove height 84 cm, diameter 56 cm. Amount of stones about 110 kg and length of firewood up to 70 cm. Door glass (230 x 230 mm) available upon request.

ST-220 GL – angular net casing, large door glass (330 x 330 mm), stainless steel panel and handle. Stove height 84 cm, width 49 cm ja depth 61 cm. Amount of stones about 160 kg and length of firewood up to 70 cm.

STY-220 GL – round net casing, large door glass (330 x 330 mm), stainless steel panel and handle. Stove height 84 cm, width 49 cm ja depth 61 cm. Amount of stones about 160 kg and length of firewood up to 70 cm.

Chimney connection from above, possibility to order the stove contents reversed. The door opens from right to left as standard, can also be ordered the other way around.
